Profile Summary

MERN Stack Developer with experience building full stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing responsive interfaces, integrating APIs, and implementing real world application features. Currently working as a Software Developer Intern contributing to an advertising management platform.

Experience

Software Developer Intern — Techplex (Feb 2026 – Present)

- Contributing to development and maintenance of web applications used for digital advertising displays in malls.
- Worked on fixing issues and implementing new features for the vitavista.ru platform.
- Collaborated with backend services using PostgreSQL and Prisma ORM.
- Implemented CDEK shipping API integration.
- Deployed updates to production servers using SSH and Git (git pull origin main).
- Debugged and tested features to ensure stable production releases.

Technical Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Redux Saga, Tailwind CSS, Bootstrap, Framer Motion.
- **Backend:** Node.js, Express.js, REST APIs **Databases:** MongoDB, PostgreSQL, Supabase, Prisma ORM
- **Tools:** Git, GitHub, SSH, Postman, Vercel.

Projects

Car Rental Web Application [Link](#)

- Built full stack booking platform using Node.js, Express, MongoDB, and HBS.
- Implemented authentication, admin dashboard, and image uploads.
- Integrated email and SMS notifications.

News App (React + API Integration) [Link](#)

- Built a React-based news platform fetching real-time data from NewsAPI.
- Implemented category filtering, infinite scrolling, and dynamic rendering.
- Designed a responsive and modern UI.

E Commerce Platform (React, Redux, Redux Saga)

- Developed a React-based e-commerce interface with product listings and filters.
- Implemented state management using Redux and Redux Saga.
- Integrated APIs for dynamic product data.

PastebinLite – Text Sharing Application [Link](#)

- Built a serverless text sharing platform using Next.js and Supabase.
- Implemented TTL and max-view constraints at the API level.
- Ensured secure rendering of user content and proper error handling.

Education

- Bachelor of Computer Applications (BCA), IGNOU — 2024 – Present
- Senior Secondary (12th), Jeevan Public School (CBSE) — 2022
- Secondary (10th), Jeevan Public School (CBSE) — 2020
